CHAPTER	PAGE
PREFACE	V
I HISTORICAL INTRODUCTION	I
II THEORY OF PHOTOELECTRIC EMISSION	3
(A) RELATIONSHIP BETWEEN RADIATION AND PHOTOELECTRIC EMISSION	3
(B) EINSTEIN'S THEORY OF THE PHOTOELECTRIC EFFECT	7
(C) CONDITIONS FOR PHOTOELECTRIC EMISSION	10
III MANUFACTURE AND PROPERTIES OF SOME TYPES OF PHOTOELECTRIC CATHODES	17
(A) THE ZINC PHOTOCATHODE	19
(B) THE ALKALI METAL PHOTOCATHODE	19
(C) THE ALKALI HYDRIDE PHOTOCATHODE	20
(D) THE SILVER-OXYGEN-ALKALI PHOTOCATHODE	21
(E) THE ANTIMONY-ALKALI PHOTOCATHODE	32
(F) VARIOUS ALLOY PHOTOCATHODES	43
IV MATCHING OF LIGHT SOURCES AND PHOTOCATHODES	45
(A) LIGHT SOURCES	45
(B) MEASUREMENT OF THE EFFICIENCY OF PHOTOCATHODES	49
(C) EXAMPLES OF SUITABLE PHOTOCATHODES FOR SOME LIGHT SOURCES	52
(D) OUTLOOK FOR FUTURE DEVELOPMENTS	55
V VACUUM PHOTOCELLS	57
(A) SATURATION POTENTIAL	57
(B) FREQUENCY RESPONSE	58
VI GASFILLED PHOTOCELLS	61
(A) MECHANISM OF GAS AMPLIFICATION	61
(B) GASFILLED PHOTOCELLS IN PRACTICE	64

CHAPTER	PAGE
VII MULTIPLIER PHOTOCELLS	73
(A) GENERAL PRINCIPLES	73
(B) SECONDARY EMISSION	74
(C) DESIGN OF MULTIPLIER PHOTOCELLS	76
(D) CONSIDERATIONS CONCERNING THE PRACTICAL USE OF MULTIPLIER PHOTOCELLS	78
VIII APPLICATIONS OF PHOTOCELLS	82
(A) GENERAL	82
(B) PHOTOMETRY	84
(C) REPRODUCTION OF RAPIDLY VARYING LIGHT INTENSITIES	88
(D) DETECTION OF RELATIVELY LARGE CHANGES OF LIGHT INTENSITY	98
(E) COMPARISON OF EMISSION CELLS AND BARRIER-LAYER CELLS	98
(F) SUMMARY	99
BIBLIOGRAPHY	101
INDEX	103
