

## CONTENTS

	PAGE
PREFACE. . . . .	vii
LIST OF TABLES . . . . .	xv
LIST OF EQUATIONS. . . . .	xv
PICTORIAL STUDIES. . . . .	xvii
- CHAPTER 1	
INTRODUCTION . . . . .	3
Section 1-1. The Photographic Process—1-2. Photography as an Implement in Modern Life—1-3. Photography as an End in Itself—1-4. The Evolution of Photography.	
CHAPTER 2	
PHOTOGRAPHIC OPTICS. . . . .	19
Section 2-1. Light—2-2. Waves and Rays—2-3. The Laws of Geometrical Optics—2-4. Illumination and Units of Light Measurement—2-5. Reflecting and Transmitting Properties of Bodies—2-6. Polarized Light—2-7. Pinhole Images—2-8. Magnification—2-9. Perspective—2-10. Stereoscopic Images—2-11. Photography and Vision.	
CHAPTER 3	
LENSES . . . . .	52
Section 3-1. Introduction to Image Formation—3-2. The Lens—3-3. Cardinal Points of a Lens—3-4. Image Formation by a Lens—3-5. The Lens Equation—3-6. Magnification: Dependence upon Object Distance and Focal Length—3-7. Summary of Image Formation—3-8. The Compound Lens—3-9. The Telephoto Lens—3-10. Diaphragms and Pupils—3-11. Speed of a Lens—The $f$ -Number—3-12. Depth of Field and Depth of Definition—3-13. Resolving Power of a Lens—3-14. Aberrations of a Lens—3-15. Chromatic Aberration—3-16. The Monochromatic Aberrations—3-17. Lens Design and Correction of Aberrations. Achromatism—3-18. Flare—3-19. Uneven Illumination—3-20. Covering Power of a Lens—3-21. Lens Manufacturing—3-22. Types of Photographic Lens.	
CHAPTER 4	
CAMERAS AND ACCESSORIES . . . . .	116
Section 4-1. Introduction—4-2. Box Cameras—4-3. Folding Cameras—4-4. Reflex Cameras—4-5. The Modern Miniature Camera—4-6. Special Cameras—4-7. Amateur Motion-picture Cameras—4-8. Care of the Camera—4-9. Accessories—4-10. Lens Mounts—4-11. Angle of View—4-12. View Finders—4-13. Range Finders—	

## CONTENTS

	PAGE
4-14. Shutters—4-15. Negative Material—4-16. Use of Polarizing Screens—4-17. Synchronized Flashlight—4-18. The Darkroom—4-19. Practical Notes on Camera Manipulation.	
CHAPTER 5	
<b>THE PHOTOGRAPHIC EMULSION AND THE LATENT IMAGE . . . . .</b>	<b>156</b>
Section 5-1. Introduction to Image Perpetuation—5-2. The Negative Emulsion—5-3. The Silver Halides—5-4. Gelatin—5-5. The Support—5-6. The Photographic Emulsion: Its Grainy Structure—5-7. Response of the Emulsion to Light—5-8. Principal Properties of the Emulsion and Their Interdependence—5-9. Minor Properties of the Emulsion—5-10. Control of Emulsion Properties—5-11. Manufacture of the Emulsion—5-12. The Latent Image. Photochemistry and Related Phenomena—5-13. Nature of the Latent Image—5-14. Available Types of Emulsion.	
CHAPTER 6	
<b>EXPOSURE AND THE NEGATIVE. . . . .</b>	<b>199</b>
Section 6-1. The Perfect Negative—6-2. The Law of Light Absorption—6-3. Exposure and Density. The Characteristic Curve of an Emulsion—6-4. Analysis of the Characteristic Curve—6-5. Useful Exposure Scale. Latitude of Exposure—6-6. Contrast. Effect of Development upon the Characteristic Curve—6-7. Requirements for Making a Scientifically Perfect Negative—6-8. Speed Indices—6-9. Scheiner Numbers—6-10. The DIN System—6-11. H and D Numbers—6-12. Weston Numbers—6-13. Minimum Useful Gradient—6-14. Comparison of Speed Indices—6-15. Exposure Meters—6-16. Notes on Exposure.	
CHAPTER 7	
<b>DEVELOPMENT OF THE NEGATIVE AND AUXILIARY PROCESSES. . . . .</b>	<b>221</b>
Section 7-1. Introduction—7-2. Developing Agents—7-3. Constitution of a Chemical Developer—7-4. Time Rate of Chemical Development—7-5. Diversity of Developers—7-6. Control of Granularity in Processing—7-7. Chemical Fog—7-8. Fixation—7-9. Washing and Drying—7-10. Summary of the Chemical History of a Grain—7-11. Auxiliary Processes—7-12. Desensitization—7-13. Hypersensitization—7-14. Reduction—7-15. Intensification—7-16. Reversal—7-17. Local Work, and Retouching—7-18. Practical Notes on Processing Negatives.	
CHAPTER 8	
<b>COLOR AND ITS INFLUENCE IN PHOTOGRAPHY. . . . .</b>	<b>258</b>
Section 8-1. Introduction—8-2. Spectrum Colors—8-3. Color Properties of Light Sources—8-4. Color Properties of Transparent Media—8-5. The Colors of Objects—8-6. Color Sensitivities of Photographic Emulsions—8-7. Color Filters—8-8. Correction Filters—8-9. Contrast Filters—8-10. The Factor of a Filter—8-11. Practical Notes on the Use of Filters.	
CHAPTER 9	
<b>POSITIVE PRINTS . . . . .</b>	<b>304</b>
Section 9-1. Introduction—9-2. Printing on Paper—9-3. Print Contrast and Negative Contrast—9-4. Limitations of Paper Prints—9-5. Photographic Papers—	

## CONTENTS

	PAGE
9-6. Contact Printing—9-7. Exposure of Printing Paper—9-8. Print Development—9-9. Fixing—9-10. Washing—9-11. Drying—9-12. Finishing of Prints—9-13. Transparencies. Lantern Slides—9-14. Methods of Producing a Colored Image—9-15. Toning of Silver Prints—9-16. Pigmented Prints—9-17. Special Printing Methods—9-18. Imperfections of the Photograph—9-19. Practical Notes on Printing.	
CHAPTER 10	
<b>PROJECTION PRINTING . . . . .</b>	<b>335</b>
Section 10-1. Introduction—10-2. The Enlarger—10-3. Enlarging Technique—10-4. Rectifying Perspective—10-5. Dodging and Vignetting—10-6. Diffusing—10-7. Composite Printing—10-8. Practical Notes on Enlarging.	
CHAPTER 11	
<b>NATURAL-COLOR PHOTOGRAPHY . . . . .</b>	<b>354</b>
Section 11-1. Introduction—11-2. Color Vision—11-3. Natural-color Photographic Processes—11-4. Additive and Subtractive Color Photography—11-5. Limited Fidelity of Three-color Photography—11-6. Additive Processes—11-7. Subtractive Processes—11-8. Practical Notes on Color Photography.	
CHAPTER 12	
<b>SCIENTIFIC AND TECHNOLOGICAL PHOTOGRAPHY . . . . .</b>	<b>392</b>
Section 12-1. Record Photography—12-2. Analysis of Motion. Time-space Relationships—12-3. Analysis of Radiation. Spectrography—12-4. Analysis of Matter—12-5. Photography in Astronomy—12-6. Photomicrography—12-7. Photography in Medicine—12-8. Photography in Industry—12-9. Aerial Photography—12-10. Military Photography—12-11. Records of Irreplaceable Objects—12-12. Auxiliary Technical Uses of Photography.	
CHAPTER 13	
<b>PHOTOMECHANICAL REPRODUCTION . . . . .</b>	<b>450</b>
Section 13-1. Introduction—13-2. Principles of Photomechanical Reproduction—13-3. Line Plates—13-4. Half-tone Plates—13-5. Photogravure—13-6. Rotogravure—13-7. Photolithography—13-8. Color Printing.	
CHAPTER 14	
<b>PICTORIAL PHOTOGRAPHY . . . . .</b>	<b>467</b>
Section 14-1. Introduction—14-2. Photography as a Fine Art—14-3. The Pictorial Idea—14-4. Pictorial Arrangement—14-5. Control of Composition in Photography—14-6. Exhibiting the Picture.	
<b>BIBLIOGRAPHY . . . . .</b>	<b>489</b>
<b>APPENDIX A—MATHEMATICS . . . . .</b>	<b>495</b>
Section A-1. Functions, Symbols, and Units—A-2. The Symbols sin, cos, and tan—A-3. Logarithmic Graphs.	

## CONTENTS

	PAGE
<b>APPENDIX B—CHEMISTRY . . . . .</b>	<b>504</b>
<b>FORMULARY . . . . .</b>	<b>511</b>
<p>1. General Purpose M-Q Developer—2. Medium-Granularity M-Q Borax Developer—3. M-Q Process Developer—4. Low-Granularity Developer—5. Brown Tone Developer for Prints and Lantern Slides—6. All-purpose Amidol Developer—7. Physical Developer—8. Stop Bath—9. Acid Hardening Fixing Bath—9a. Acid Hardener—10. Chrome Alum Fixing Bath—11. Chrome Alum Hardener—12. Formalin Hardener—13. Chromium Intensifier (Bleach)—14. Farmer's Reducer—15. Persulfate Reducer—16. Sepia Redeveloping Formula—17. Hypo-alum Sepia Toner—18. Liver of Sulfur Sepia Toner—19. Nelson Gold Toner—20. Goldthiourea Toner—21. Copper Toner—22. Iron Blue Toner—23. Minus-red Metallic Toner—24. Minus-green Metallic Toner—24a. Another Minus-green Metallic Toner—25. Minus-blue Metallic Toner—25a. Transparent Minus-blue Metallic Toner—26. Mordant for Dye Mordanting—27. Dye-coupling Developers—28. Carbon-process Sensitizer—29. Bleach for Reversal—30. Bath for Seebeck Effect—31. Desensitizer.</p>	
<b>MANUAL . . . . .</b>	<b>523</b>
<p>Introduction. Darkroom Practices—Experiment 1. Pinhole Photography—2. Camera Manipulation—3. Introduction to Contact Printing—4. Perspective; Angle of View—5. Depth of Field—6. Lens Quality—7. Copying; Contrast, Exposure Scale, and Resolving Power of an Emulsion—8. Exposure—9. Characteristic Curve—10. Constituents of a Developer—11. Orthochromatics—12. Manipulation of Color Contrasts—13. Adaptability of Printing Paper—14. Projection Printing—15. Lantern Slide—16. Polarizing Screen—17. Reflex Camera; Focal-plane Shutter—18. Miniature Camera—19. Stereo Photography—20. Within-the-lens Shutter Test—21. Focal-plane Shutter Test—22. Minor Properties of the Emulsion—23. Physical Development—24. Hypersensitization—25. Reduction and Intensification—26. Infrared Photography—27. Toning—28. Pigment Printing—29. Additive Color Photography—30. Subtractive Color Photography—31. Photomicrography.</p>	
<b>INDEX . . . . .</b>	<b>569</b>
