

CONTENTS

1	FILM LANGUAGE AS A SYSTEM OF VISUAL COMMUNICATION	1
	Beginnings of film language	2
	Types of film maker	3
	Forms of film expression	3
	Defining out aims	4
2	THE IMPORTANCE OF PARALLEL FILM EDITING	6
	Two basic types	6
	Action and reaction	8
	Peak moments and the understanding	9
	How parallel editing is obtained	10
	A wider perspective	11
3	DEFINING THE BASIC TOOLS	12
	Newsreel	12
	Documentary	13
	Fiction film	14
	Three types of scene	14
	Elements of film grammar	15
	The shot	15
	Movement	15
	Distances	16
	Types of editing	17
	Visual punctuation	18
	Scene matching	19
	Opposed glances	21
	Centre of interest alternates	23

4 THE TRIANGLE PRINCIPLE	26
Basic body positions	26
Line of interest	27
Importance of the heads	30
Five basic variations of the triangle principle	32
Emphasis by composition	36
Types of visual emphasis	39
Triangle principle: One person	46
5 DIALOGUE BETWEEN TWO PLAYERS	50
Face to face	50
Number contrast	52
Performers side by side	52
Players behind one another	55
Word of caution	59
Camera distance	61
Camera and actor height	62
Subject lying side by side	66
Telephone conversations	68
Opposed diagonals	69
Translucent density masks	73
Players reflected on mirrors	74
6 THREE-PLAYER DIALOGUE	75
Regular cases	75
Irregular cases	76
External/internal reverse camera positions	80
Internal reverse camera positions	84
Parallel camera positions	84
Pivoting point	85
Emphasizing the centre of interest	90
Partial emphasis	91
Total emphasis	93
A 'north-south' to 'east-west' change	95
Using only four camera positions	95
Introducing internal shots	98
Eight camera sites are employed	100
A simple method using three camera sites	103
Using a pivoting shot	104
Deliberate omission	105
Summing up	107

7	DIALOGUE INVOLVING FOUR OR MORE PERSONS	109
	Simple cases	109
1	Using a common visual axis	110
2	Using a right angle camera site	111
	Groups arranged round a table	112
	Subdividing the group	116
	Geometrical patterns	118
	Several opposed sectors	121
	Handling large groups	124
	A performer faces an audience	124
	A crosswise change of the line of interest	127
	Crowd with main player at centre	129
	Actors as pivots	130
8	EDITING PATTERNS FOR STATIC DIALOGUE SCENES	135
	Approaching and receding patterns	136
	How a sequence begins	136
	Re-establishing shots	137
	Importance of silent reactions	138
	Inserts and cut-aways	138
	Number contrast	149
	Parallel editing of master shots	149
	Line of interest—changing sides	152
	Pause between dialogues	152
	Time compression	156
	Speeding dialogue tempo	159
9	THE NATURE OF SCREEN MOTION	160
	Motion broken down	162
	Changing view with movement	163
	Using cut-aways	164
	Neutral direction	164
	Performer indicates the change	164
	Contrasting motions in the same half screen	172
	Conditions of the cut	175
	Where to cut	175
	Cutting on action	176
10	CUTTING AFTER THE MOVEMENT	178

11	MOTION INSIDE THE SCREEN	188
	Turning	189
	Using a common visual axis	213
	Brief summary	245
	A personal preference	248
12	MOTION INTO AND OUT OF SHOT	249
	Multiple fragments	249
	Motion in three fragments	250
13	PLAYER <i>A</i> MOVES TOWARDS PLAYER <i>B</i>	261
	Converging motion	261
	Right angle camera sites	262
	Reverse camera angles	266
	Parallel camera sites	268
	Common visual axis	268
	<i>A</i> walks beyond <i>B</i>	274
14	USING MASTER SHOTS TO COVER MOTIONS ON THE SCREEN	276
15	IRREGULAR CASES	289
	Visual pause with larger groups	290
	The pause is omitted	293
	Using reverse angles	294
	Divergent motions	298
	Constant screen position for one player	298
	Both players move	299
16	PLAYER <i>A</i> MOVES AWAY FROM PLAYER <i>B</i>	301
17	PLAYERS MOVE TOGETHER	322
	Intermittent motion	339
18	SOLVING DIFFICULT EDITING SITUATIONS	340
	Movement between camera and static subject	340
	Motion at the beginning of the second shot	343
	Motion beyond the static players	345
	Using right angle camera sites	346
	Both players move	348
	Hiding a moving subject in the first shot	349

Using a strong foreground motion	351
Substitution of the static subject	351
Redirecting attention	353
Using non-human movement	357
Parting curtain effect	359
 19 OTHER TYPES OF MOTION	 360
Circular movement	360
Vertical movement	370
Dynamic stops	376
 20 TWENTY BASIC RULES FOR CAMERA MOVEMENT	 380
Movement and the camera	380
Basic guidelines for camera movement	380
Solid dramatic motivation	384
 21 THE PANNING CAMERA	 385
Scanning panoramically	385
Chase sequences	386
Intermittent panning	399
Full circle panning	401
Fast panning	403
In two directions	405
Vertical tilts	406
Side tilts	409
Joining a static and a panning shot	409
Editing two consecutive panning shots	415
Acrobatic pans	421
 22 THE TRAVELLING CAMERA	 424
Intermittent action covered by a continuous tracking	424
Joining a static and a tracking shot	426
Intermittent camera tracking	433
Using both sides of the track	436
Winding paths	437
Panning while tracking	443
Camera and performers move in opposite directions	446
Single file formations	454
Tracking speed	456

Subject approaches tracking camera	457
Editing consecutive tracking shots	458
Static shots intercut within a tracking master shot	461
Circular tracking	464
 23 THE CAMERA CRANE AND THE ZOOM LENS	 469
Following action	469
Foreground props stress height	469
To visually unite two or more story points	470
To inject movement into static situations	471
To single out a story point in a panoramic movement	472
To provide strong movement for cutting on action	474
Zooming	475
Zooming speeds	476
Zooming and panning combined	477
Tilt shots using zoom effects	479
Camera tracks as it zooms	479
Zooming through foreground obstacles	482
 24 ACTION SCENES	 483
Standard formulas	484
The subjective point of view	486
Five ways of enhancing visual action	492
Reaching a visual climax	495
Breaking the climatic action into several shots	497
High speed and slow motion for action sequences	500
Follow focus technique	501
 25 EDITING IN THE CAMERA	 502
Pre-planning is required	502
The pause between movements	503
The change of zone	503
Approaching or receding from the camera	508
Changing the body position	514
Substitution by sectors	516
Switching screen sectors	523
Numerical contrast	533
Editing within the film frame	538

26 MOVING FROM ZONE TO ZONE	542
General principles	542
A group moving from zone to zone	543
The group expands	545
Two further variants	548
A player moves, the other remains still	551
The group contracts	554
Devices for zone change	554
27 COMBINED TECHNIQUES	564
Shot by shot editing	564
Merging the techniques	571
Summing up	577
28 FILM PUNCTUATION	579
Transitions from scene to scene: fade out—fade in	579
White-outs and colour fades	579
Dissolve	579
Wipe	580
Iris	580
Use of dark areas	581
Titles	581
Props	581
Light change	581
Question and answer	582
A movement in the same direction	582
Substitution of an object	582
Word repetition	582
A deceptive visual match	582
Cutting around a prop	587
A sudden close up	588
Transition by parallel editing	588
Scene openers	589
The actor	590
The camera	590
Introducing points of view	591
Abrupt jump cuts used as punctuation	595
Jump cuts as time transitions	597
Selected peaks of action	597
Inaction as punctuation	599

Single shots as pauses in narration	599
An entire sequence used as a narrative pause	601
Out of focus images as punctuation	602
Dark screen used as punctuation	603
Punctuation by camera motion	604
Vertical punctuation	611
Frozen frame	614
INDEX	616
