<i>Preface</i>	V
<i>List of Illustrations</i>	xiii

PART 1

LIGHT, COLOR PERCEPTION AND RENDITION

CHAP.		
1	Vision and Color	3
	Radiant Energy—The Visible Spectrum—Light and Vision—The Eye—Color Perception—Color Vision—The Additive Method of Mixing Colors—The Subtractive Method of Mixing Colors—Reflection, Absorption, and Transmission of Color—Achromatic Colors, Tints, and Shades—Complementary Colors—Hue, Brightness, and Saturation—The Appearance of Colors—After-images—Simultaneous Contrast—Successive Contrast	
2	Illumination Control and Computation	25
	Specular Reflection—Spread Reflection—Diffuse Reflection—Compound Reflection—Refraction—Prisms—Lenses—Polarization—Measurement of Luminous Output—Measurement of Illumination—Illumination Calculations—Reflector and Lens Efficiency	
3	Additive Color Blending	44
	Blending of Spectral Colors—Spectral Characteristics of the Red Primary—Spectral Characteristics of the Green Primary—Spectral Characteristics of the Blue Primary—Production of Saturated Colors—Production of Pastel Colors—Additive Four-color Lighting—Magenta, Yellow, and Peacock-blue Basic Colors—Pastel Basic Colors—Fluorescent Lamps for Primary Colors	
4	Color Temperature and Specification	54
	Black-body Radiation—The C.I.E. Chromaticity Diagram—Color Matching and Grading	
5	Color Quality in Fluorescent White Lighting	68
	Spectral-energy Distributions—Daylight Fluorescent Lamp—Cool White Fluorescent Lamp—De Luxe Cool White—Standard White (3500°K) Fluorescent Lamp—Warm White Fluorescent Lamp—De Luxe Warm White Fluorescent Lamp—Soft White Fluorescent Lamp—Combinations of Lamps—Fluorescent Lamps for Color Matching—Environment	

PART 2

PRODUCTION AND CONTROL OF COLORED
AND DIRECTIONAL LIGHTING

CHAP.		PAGE
6	Light Sources and Filters	85
	Incandescent Lamps—Color-temperature Ratings—Lamp Performance— Filament Construction—Tungsten-filament Vacuum Lamps—General- service Gas-filled Incandescent Lamps—Lamps with Reflector Bulbs— Lamps for Use with Lens Systems—Motion-picture Studio Lamps— Lamps for Color Photography—Electric Discharge Lamps—Mercury- vapor Lamps—Sodium-vapour Lamps—Carbon-arc Lamps—Fluorescent Tubular Lamps—Ultraviolet and Black Light—Colored Filters	
7	Lighting Equipment for Color, Accent, and Modeling	109
	Multi-Lamp Skeleton Strips—Multi-lamp Continuous Reflector Strips —Multi-lamp Strips with Individual Reflectors—Reflector and Projector Lamp Strips—Compartment Strips—Footlights—Disappearing Foot- lights—Borderlights—Revolving Borderlights—Vertical Strips with Color Filters—Cyclorama Borderlights—Cyclorama Footlights—Backing Strips —Groundrows—Wide-angle Floodlights—Narrow-angle Floodlights— Multiple Wingflood Assemblies—Broads—Plano-convex Lens Spotlight— Fresnel (Prismatic Lensplate) Spotlight—Spotlights with Ellipsoidal Reflectors—Mirror Spotlights with Variable Gate—Multi-lamp Spot- lights—Carbon-arc Spotlights—Spotlight Color Attachments—Effects Machines and Attachments—Linneback Lantern Projectors	
8	Dimmers and Color Controls	131
	Types of Dimmers—Slider-type Resistance Dimmers—Rotary-type Resistance Dimmers—Autotransformer Dimmers—D.C. Controlled Reactor Dimmers—Electronically Controlled Reactor Dimmers— Electronic-tube Dimmers—Dimmers for Hot-cathode Fluorescent Lamps —Requirements of Manually Operated Dimmer Switchboards—Portable Dimmer Switchboards—Dimmer Switchboards for Permanent Installation —Pre-set Type Dimmer Switchboards—Color Selector Control Boards— Motorized Cycle Dimmer Color Mixing Systems—Uni-directional Dim- mers—Cam-operated Dimmers—Single-dimmer Cycle Color Mixers— Drum-switch Controlled Motor Dimmers—Low-voltage Remote-control Systems—Color Selector Automatic Control Systems—Color Contrast Switching—Patch Panels and Rotary Connection Switches	

PART 3

PSYCHOLOGICAL AND AESTHETIC FACTORS

9	Directional Light, Shade, and Color	163
	Visual Elements of Appearance—Angles for Modeling Light—Arrange- ment of Directional Lighting—Dominant Lighting—Secondary Lighting —Edge or Rim Lighting—Fill-in Lighting—Shadows—Color of Lighting —New Art of Luminous Color—Methods of Changing Color—Use of Colored Filters—Additive System of Three-color Lighting—Color Composition	

CHAP.		PAGE
10	Color Harmony, Contrast, and Discord	182
	Primary Colors in Lighting—Additive Color Mixtures and Terminology —Complementary Colors—Color Harmony—Color Contrasts—Discords —Color Quality	

11	Psychological Aspects of Color in Lighting	192
	Psychological Reactions to Color—Warm and Cold Colors—Advancing and Retiring Colors—Color Aesthetics—Associations of Color and Mood —Green in Lighting—Color Succession—Psychological Factors in Color Vision—Adaptation and Induction of Color—Color Music	

PART 4

LIGHTING APPLICATION TECHNIQUES

12	Display Lighting	207
	Form and Color—Brightening Merchandise Colors—Broken White Lighting—Direction of Lighting—Color Reflectance of Materials—Back- ground Lighting—Daylight Window-glass Reflections—Lighting Distri- bution Control and Layout—Merchandise Fading—Mobile Color Lighting —Hue Contrast in Mobile Color Lighting—Mobile Color Compositions— Color Changing Highlights—Mobile Lighting Equipment Layout— Motorized Control Apparatus—Free-standing Displays—Variable-accent Lighting—Variable and Mobile White Light—Eye Adaptation—Equip- ment for Variable White Light	

13	Architectural Lighting	240
	Lighting an Element of Architectural Design—Luminous Lines, Areas, and Patterns—Color Lighting of Coves and Cornices—Compound Color Effects in Coves and Cornices—Color Lighting of Luminous Beams and Luminaires—Color Lighting of Troffers and Built-in Panels—Color Lighting of Luminous and Louverall Ceilings—The Lobby Lighting at 383-5 Madison Avenue, New York, N.Y.—Reflective-surface Color Schemes—Design Changes by Colored Light—Glass Bricks and Patterned Glass—Downlights and Directional Units	

14	Photographic, Motion-picture, and Television Studio Lighting	274
	Color Quality in Photographic Lighting—Color Quality in Motion- picture Studio Lighting—Color Quality in Television Studio Lighting— Color Quality in Motion-picture Projection Lighting.	

15	Stage Lighting	282
	Footlights—Front Lighting—Acting-area lighting—Border and Drop Cloth Lighting—Backdrop Lighting—Cyclorama Lighting—Local and Special Lighting—Color Systems—Control Boards and Dimmer Arrange- ments—Arena Theaters—The Art of Stage Lighting—The Lighting of Painted Scenery—Impartation of Color to White Set Pieces	

CHAP.		PAGE
16	Signs and Exterior Lighting.	309
	Electric Signs—Luminous Fronts—Floodlighted Signs—Floodlighting of Buildings—Color Lighting for Fountains, Waterfalls, and Pools	
17	Special Lighting Effects	318
	Changing the Apparent Color of an Object—Changing Designs by Colored Light—The Chameleon Automobile—White Man to Colored Man Effect —Swim Suit to Nude Effect—Multi-color Shadows	
18	Color in Lighting for Photochemical Reproduction Processes	330
	Incandescent Lamps—Fluorescent Lamps—Black Light—Mercury Dis- charge Lamps—Carbon-arc Lamps—Glow Lamps	
	<i>Index</i>	333
