

CONTENTS

Chapter	Page
I INTRODUCTION - - - - -	1
II WHAT IS PHOTOGRAPHY? - - - - - A brief history—its manifold uses—what it is.	3
III WHAT IS LIGHT? - - - - - The nature of light—the effect of light on silver.	10
IV THE OPTICS OF PHOTOGRAPHY - - - - - What is a lens?—focal length—perspective—hyperfocal distance—aperture—depth of focus—types of lenses—lens aberrations—telephoto lenses—wide-angle lenses.	21
V NEGATIVE EMULSIONS - - - - - Colour-blind emulsions — orthochromatic emulsions — panchromatic emulsions — comparative sensitivity — correction filters — characteristic curve — emulsion speed—speed systems.	35
VI THE THEORY OF CHEMICAL DEVELOPMENT - - - - - Reducing agents — accelerators — preservatives — restrainers—normal developers—special developers.	45
VII PRACTICAL NEGATIVE PROCESSING - - - - - Developing — temperature — contrast and gamma-contrast — developing methods — fixing — washing — hardening—drying.	52
VIII FAULTS IN NEGATIVES - - - - - What they indicate—how to correct them.	63
IX EXPOSURE - - - - - Governing factors — exposure meters — deciding the exposure—shutters.	66
X CAMERAS - - - - - Studio cameras — hand cameras — reflex cameras — twin-lens reflexes—miniature cameras.	73
XI USING THE CAMERA - - - - - Studio work — still life — models — copying — portraiture—outdoor work—choosing the film.	82

Chapter	Page
XII ELEMENTARY LIGHTING - - - - -	91
The main light — the secondary light — background lighting — outdoor lighting — back lighting — lighting for copy-work.	
XIII PRINTING - - - - -	99
Characteristic curves — contrast and gradation — developing—test strips—fixing—washing.	
XIV CONTACT AND PROJECTION PRINTING - -	106
Making contact prints — gaslight paper — enlarging — the light source — enlarger construction — focussing — shading—reducing.	
XV PRINT FINISHING - - - - -	113
Drying—glazing—spotting—mounting—mounts.	
XVI PHOTOGRAPHIC MATERIALS - - - - -	119
Plates and films — film packs — roll films — backing — standard sizes—photographic papers—packing.	
XVII COMPOSITION - - - - -	126
Unity — size — position — differential focus — continuity of line — repetition — balance — contrast — horizontals and verticals — directional lines — composing and trimming.	
XVIII ALLIED PROCESSES - - - - -	140
Cyanotype — gum bichromate — carbon prints — carbonyl prints — oil prints — bromoil prints — bromoil transfer.	
APPENDIX I - - - - -	145
Notes on formulæ—tables of weights and measures—conversion tables—photographic chemicals.	
APPENDIX II - - - - -	152
Preliminary examination syllabus — bibliography — specimen papers.
