	PAGE
1. <b>Meet Your Camera</b> .....	1
The Lens — Focus — Depth of Focus — Fixed Focus — Focal Length — $f$ Values — Summary of Lens Settings — The Shutter — The Body of the Camera — The Film Chamber — Carrying Cases — Tripods — Sunshade — Camera Routine in the Field.	
2. <b>Selecting a Camera</b> .....	15
The Folding Rollfilm Camera — The Miniature Camera — The Reflex Camera — Trying Out a Camera — Buying a Secondhand Camera.	
3. <b>Exposure</b> .....	26
Correct Exposure — Measuring the Light — Exposure Tables — Exposure Factors — Insufficient Light — Sensitivity of Film — Other Factors Affecting Exposure — Motion in the Subject — Color of the Light — Color of the Subject — Outdoor Exposure Routine — Indoor Exposure Routine — Electric Exposure Meters — The Need for Meters — Use of Meters at the Camera Position — Using the Meter at the Subject — Extremes of Contrast — Matching Exposure to Film — Negative Control — Color Sensitivity of Exposure Meters — Care of Meters.	
4. <b>Photographic Lighting</b> .....	45
Indoor Lighting Equipment — Lighting for Detail — Lighting for Modeling of Features — Background Values — Sunlight — Control of Contrast — Flashlight Photography — The Open Flash — Lamp Placement — Estimating the Exposure — Synchronized Flash — Multiple Flash — Lighting Suggestions — Synchro Sunlight.	
5. <b>The Darkroom</b> .....	63
Ventilation — Non-Actinic Light — Storage Space — Furniture and Fixtures — Electric Installation — Darkroom Equipment List — The Enlarger — Auxiliary Features — The Easel — Printers — Next to Godliness.	

	PAGE
<b>6. Negative Development</b> .....	74
Component Parts of a Developer — Preservative — Energizer — Restrainer — Characteristics of Different Developers — Developer Formulas — Shortstop — Fixing Bath — Tank Development — Time and Temperature Processing — Agitation — Fixing — Tray Development — Washing — Drying — The Effect of Variation in Time, Temperature, and Developer — Gamma — The Problem of Grain — Care in Processing — Fine-Grain Emulsion — Fine-Grain Developer — Diffuser-Type Enlarger.	
<b>7. Contact Printing</b> .....	92
Trays — Printing Frame — Printing Box — Safelight Lamp — Timer — Chemical Supplies — Miscellaneous Supplies — Working Routine — Masking — Paper Contrast — Determining Correct Printing Time — Print Quality — Determining Correct Contrast Grade of Paper — Fixing, Washing, and Drying.	
<b>8. Projection Printing</b> .....	114
Working Routine — Adjusting Exposure for Magnification — Adjusting Exposure for Stop — Dodging — Combination Printing — Developer Modification — Paper Surfaces — Paper Color — Paper Brilliance — Paper Texture — Classification of Paper Surfaces — Comparative Paper Speeds — Summary of Enlarging Procedure.	
<b>9. After-Treatment of Negatives and Prints.</b> .....	129
Precautions — Weak Negatives — Mercuric Intensifier — Chromium Intensifier — Dense Negatives — Farmer's Reducer — Ammonium Persulphate Reducer — Local Treatment — Spotting — Toning — Sepia Tones — Red Tones — Blue Tones — Green Tones — Dye Toners — Mounting Prints — Filing Negatives and Prints.	
<b>10. Monochromatic Rendering of Color</b> .....	143
What is Color? — Color Sensitivity in Photography — The Nature and Quality of the Light — The Transmission Characteristics of Filters — General Filter Characteristics — Filters and Lens Corrections — Spectroscopic Qualities — Durability of Filters — Mounting Filters — What Color Filter to Choose — Filter Factors — Specific Filter Problems — Viewing Filters.	
<b>11. Accessories for Better Pictures</b> .....	155
Polarizing Filters — Infrared — Close-up Supplementary Lenses — Supplementary Lens Exposure — Supplementary Lens Copying — Gadgets.
