

Preface xi

Chapter 1 Introducing digital video **1**

| | | |
|------|---------------------------------------|----|
| 1.1 | Video as data | 1 |
| 1.2 | What is a video signal? | 3 |
| 1.3 | Why binary? | 5 |
| 1.4 | Colour | 10 |
| 1.5 | Why digital? | 11 |
| 1.6 | Some digital video processes outlined | 12 |
| 1.7 | Time compression and expansion | 14 |
| 1.8 | Error correction and concealment | 16 |
| 1.9 | Product codes | 17 |
| 1.10 | Shuffling | 20 |
| 1.11 | Channel coding | 20 |
| 1.12 | Video compression and MPEG | 22 |
| 1.13 | Disk-based recording | 22 |
| 1.14 | Rotary-head digital recorders | 24 |
| 1.15 | DVD and DVHS | 26 |
| 1.16 | Digital television broadcasting | 26 |
| 1.17 | Networks | 26 |
| | References | 27 |

Chapter 2 Video principles **28**

| | | |
|------|---|----|
| 2.1 | The eye | 28 |
| 2.2 | Gamma | 31 |
| 2.3 | Scanning | 33 |
| 2.4 | Synchronizing | 35 |
| 2.5 | Bandwidth and definition | 41 |
| 2.6 | Aperture effect | 42 |
| 2.7 | Colour | 43 |
| 2.8 | Colour displays | 51 |
| 2.9 | Colour difference signals | 53 |
| 2.10 | Motion portrayal and dynamic resolution | 57 |
| 2.11 | Progressive or interlaced scan? | 58 |

| | | |
|---|---|------------|
| 2.12 | Binary codes | 60 |
| 2.13 | Introduction to digital logic | 67 |
| 2.14 | The computer | 74 |
| 2.15 | The processor | 76 |
| 2.16 | Timebase correction | 77 |
| 2.17 | Multiplexing | 83 |
| 2.18 | Statistical multiplexing | 84 |
| 2.19 | Filters and transforms | 84 |
| 2.20 | FIR filters | 88 |
| 2.21 | Sampling-rate conversion | 95 |
| 2.22 | Transforms and duality | 100 |
| 2.23 | The Fourier transform | 103 |
| 2.24 | The discrete cosine transform (DCT) | 104 |
| 2.25 | Modulo- n arithmetic | 107 |
| 2.26 | The Galois field | 109 |
| 2.27 | The phase-locked loop | 111 |
| | References | 113 |
| Chapter 3 Conversion | | 114 |
| 3.1 | Introduction to conversion | 114 |
| 3.2 | Sampling and aliasing | 114 |
| 3.3 | Reconstruction | 118 |
| 3.4 | Aperture effect | 121 |
| 3.5 | Two-dimensional sampling | 123 |
| 3.6 | Choice of sampling rate | 126 |
| 3.7 | Jitter | 128 |
| 3.8 | Quantizing | 130 |
| 3.9 | Introduction to dither | 135 |
| 3.10 | Requantizing and digital dither | 136 |
| 3.11 | Basic digital-to-analog conversion | 139 |
| 3.12 | Basic analog-to-digital conversion | 141 |
| 3.13 | Oversampling | 143 |
| 3.14 | Gamma in the digital domain | 149 |
| 3.15 | Colour in the digital domain | 150 |
| | References | 154 |
| Chapter 4 Digital video processing | | 156 |
| 4.1 | A simple digital vision mixer | 156 |
| 4.2 | Keying | 163 |
| 4.3 | Digital video effects | 167 |
| 4.4 | Graphics | 179 |
| 4.5 | Applications of motion compensation | 186 |
| 4.6 | Motion-compensated standards conversion | 188 |
| 4.7 | De-interlacing | 192 |
| 4.8 | Noise reduction | 198 |
| | References | 199 |

| | |
|---|------------|
| Chapter 5 Video compression and MPEG | 200 |
| 5.1 Introduction to compression | 200 |
| 5.2 What is MPEG? | 206 |
| 5.3 Spatial and temporal redundancy in MPEG | 208 |
| 5.4 <i>I</i> and <i>P</i> coding | 215 |
| 5.5 Bidirectional coding | 216 |
| 5.6 Spatial compression | 220 |
| 5.7 A bidirectional coder | 227 |
| 5.8 Handling interlaced pictures | 231 |
| 5.9 An MPEG-2 coder | 236 |
| 5.10 The elementary stream | 237 |
| 5.11 An MPEG-2 decoder | 238 |
| 5.12 Coding artifacts | 241 |
| 5.13 Processing MPEG-2 and concatenation | 243 |
| References | 248 |
| | |
| Chapter 6 Digital coding principles | 249 |
| 6.1 Introduction | 249 |
| 6.2 Types of transmission channel | 250 |
| 6.3 Transmission lines | 251 |
| 6.4 Types of recording medium | 254 |
| 6.5 Magnetic recording | 254 |
| 6.6 Azimuth recording and rotary heads | 259 |
| 6.7 Optical and magneto-optical disks | 260 |
| 6.8 Equalization and data separation | 262 |
| 6.9 Slicing and jitter rejection | 264 |
| 6.10 Channel coding | 269 |
| 6.11 Simple codes | 271 |
| 6.12 Group codes | 274 |
| 6.13 Randomizing and encryption | 276 |
| 6.14 Partial response | 277 |
| 6.15 Synchronizing | 283 |
| 6.16 Basic error correction | 284 |
| 6.17 Concealment by interpolation | 286 |
| 6.18 Parity | 287 |
| 6.19 Block and convolutional codes | 289 |
| 6.20 Cyclic codes | 292 |
| 6.21 Introduction to the Reed–Solomon codes | 297 |
| 6.22 Correction by erasure | 304 |
| 6.23 Interleaving | 305 |
| 6.24 Product codes | 307 |
| Appendix 6.1 Calculation of Reed–Solomon generator polynomials | 309 |
| References | 311 |

| | | |
|------|---|-----|
| 9.11 | Program Specific Information (PSI) | 402 |
| 9.12 | Transport stream multiplexing | 403 |
| 9.13 | Broadcast modulation techniques | 405 |
| 9.14 | OFDM | 409 |
| 9.15 | Error correction in digital television broadcasting | 413 |
| 9.16 | DVB | 413 |
| 9.17 | ATSC | 417 |
| 9.18 | Networks | 422 |
| 9.19 | FireWire | 428 |
| 9.20 | Broadband networks and ATM | 430 |
