

## CONTENTS

I. 16-Mm Film and Its Relation to Other Sizes .....	1
Early History. Film Sizes. Sound. Color. Military Uses. Present Status.	
II. Making a 16-Mm Picture .....	11
Subject Matter. Taking the Picture. Recording the Sound. Developing and Printing for Editing. Release Printing.	
III. 16-Mm Film and Its Characteristics .....	19
Silver-Emulsion Films. Physical Characteristics. Sensi- tometric Characteristics. Types of Available Film.	
IV. Making 16-Mm Originals .....	58
Size of Originals for Release Prints. Prospective Volume of Films. Direct Production. Picture Original. Black-and- White Reversal Materials. Color Reversal. Exposure of Original Reversal. Measurement and Actinic Value of Ex- posure. Exposure Time and Camera Speed. Lenses and Lens Aperture Markings. Exposure Tests. The Film. Sound Original. Standardization of Exposure for Sound Record- ing and Direct Sound Positives. Standardization of Emul- sion Speed. Lamp Life and Lamp Conservation. Sound Track Fog and Its Sources.	
V. Dimensions and Standards in 16-Mm .....	105
VI. The Problem of 16-Mm Emulsion Position .....	132
Emulsion Position in 35-Mm Practice. Early History of 16-Mm Reversal Film. Reversal and Color Reversals—What They Are. Early History of 35-Mm and 16-Mm Sound Film. Current Status of Direct 16-Mm Sound. Kodachrome Sound Duplicating and Its Implications. Emulsion Position in 16-Mm. Emulsion Positions of Prints and How They Occur.	
VII. Cameras, Camera Equipment, and Cinematography .....	146
Cameras: General Functions; Spring-Driven; Magazine; Larger Spring-Driven; Professional; Choice; Mechanism; Adjuncts; Design. Synchronization of Picture with Sound. Cinematography.	

<b>VIII.</b>	<b>Sound, Sound Recording, and Sound-Recording Characteristics</b> .....	169
	General Nature of the Sound to Be Recorded. Fidelity of the Recorded Sound. Frequency Range and Hearing Perception. Influence of Noise. Speech and Music Reproduction. Low-Frequency Cutoff of a System. Frequency Range and Volume Range of Reproduced Sound. Actual Performance—Past, Present, and Future. Production Implications of Performance Range Requirements. Response-Frequency Characteristics in 16-Mm Sound Recording. Transfer Steps. Making Release Prints and Effect on Sound. General Recording Procedures. Practical Method Suggestions.	
<b>IX.</b>	<b>Sound-Recording Equipment and Its Arrangement</b> ....	204
	History. General Requirements for Modern 16-Mm Sound-Recording Equipment. Transfer Losses and Their Correction. Recommended Ranges of Response-Frequency Overall Characteristic. Pre- and Post-Equalizing. Recording Equipment Details. Physical Placement of Equipment in Recording. Re-recording.	
<b>X.</b>	<b>Editing and Assembly</b> .....	328
	Editing—Creative and Physical. Equipment and Tools of Editing. Cutting the Original. Preparing for Sound Recording.	
<b>XI.</b>	<b>Preservation and Storage</b> .....	355
<b>XII.</b>	<b>Processing and Release Printing</b> .....	364
	Development. Printing: the Printer. Technical Control. Practical Laboratory Operation. Performance Limitations of Recorded Sound. Fine-Grain Film and Its Applications.	
<b>XIII.</b>	<b>Projection and Projectors</b> .....	437
	Visual-Audio Media of a Classroom. The Projector. Picture Projection and the Audience. Sound Projection and the Audience. Practical Projector Performance.	
<b>XIV.</b>	<b>Duplication of Tri-pack Color Films</b> .....	501
	Kodachrome Processing and Duplicating. Available Types of Kodachrome. Competitive Positions of Present-Day 16-Mm Color Methods. Some Limitations of the Duplicating Process.	
<b>XV.</b>	<b>Industrial Applications of Current 16-Mm Sound Motion Picture Equipment</b> .....	521
	Interdepartmental Organization. Safety Promotion and	

Health Conservation. Job Technic Training. Employee Relations. Employee Advancement.	
<b>XVI. Television and Film</b> .....	<b>533</b>
Film Scanning. Apertures and Shapes. Resolving Power. Special Transmission Characteristics. Density and Contrast Characteristics. Photographing Television Images and Transmitting Film Images. Sound. Standardization.	
Appendix A. Nomenclature for Motion Picture Film Used in Studios and Processing Laboratories. Index of ASA Standards Revised as of February, 1953 .....	547
Appendix B. Symbols Proposed for Motion Picture Equipment .....	557
Appendix C. Percent Transmission <i>vs.</i> Photographic Density .....	558
Appendix D. Comparison of Emulsion Speed Values .....	560
Appendix E. Decibels Gain or Loss <i>vs.</i> Voltage and Current Ratio and Power Ratio .....	561
Appendix F. ASA Standards <i>vs.</i> Government Specifications .....	562
Subject Index .....	566
