

TABLE OF CONTENTS

The Leica Comes of Age.....	7
by Manuel Komroff	

PART I — BASIC LEICA TECHNIQUE

CHAPTER 1. Leica and Its Auxiliary Equipment.....	15
by Willard D. Morgan	

What to Photograph with a Leica. Know Your Leica. Your Beginning. How to Make Your First Leica Pictures. Loading the Leica Film Magazine. Models F and G Leicas. Interior Mechanism of the Leica. Daylight Loading. Winding the Film. Earlier Leica Models. Leica Accessories. Vidom Universal View Finder. Direct View Finder. Wide-Angle View Finder. Wintu Angle Finder. Sunshades and Their Use. Correction Lenses for Range and View Finders. Slow Timing Device. Rapid Winder. Protective Cases. Optical Short Distance Focusing Device "Nooky". Synchronized Flashlight Unit. Panorama Photography. Remote Release and Shutter Winder. Single Exposure Leica.

CHAPTER 2. My Leica Technique.....	45
by Anton F. Baumann	

Selecting Film and Developer. Filtering Solutions. Washing the Film. Selecting Lenses and Their Various Uses. Filters. Enlarging Leica Photographs. How to Look at Enlargements. Exposure and Development. Eliminating Dust. Making Lantern Slides. Making Lantern Slides by Enlarging. Black and White Enlargements from Kodachrome Positives.

CHAPTER 3. Leica Lenses.....	61
by H. W. Zieler	

The Iris Diaphragm. The Miniature vs. Larger Cameras. Depth of Focus and Relative Aperture. Depth of Focus Scale. Exposure Variations. Perspective and the Various Leica Lenses. The Hektor 28mm f:6.3. The Elmar 35mm f:3.5. The 50mm Lenses. The Hektor 73mm f:1.9. The Elmar 90mm f:4. The Thambar 90mm f:2.2. The Elmar 105mm f:6.3. The Hektor 135mm f:4.5. The Telyt 200mm f:4.5. Mirror Reflex Housing. Proper Care of Lenses. Front Lenses.

CHAPTER 4. Color Filters.....	95
by Henry M. Lester	

When Filters Should be Used. Color Sensitivity Charts. Color Balance and Correction of Contrast. Making Your Own Filter Tests. Filter Factors. Choice of Film and Filter. What Filters to Use. Filter Factor Table. Polarized Light. Pola Screens. In Color Photography. Dark Sky Effects.

**CHAPTER 5. The 35mm Film—Its Selection, Exposure
and Development**-----119

by Henry M. Lester

Part I — Film Selection

Sensitivity to Color. Speed of Emulsion. Graininess. Contrast. Latitude. Selection to Fit the Purpose. Types of Film. Panchromatic Emulsions. Orthochromatic. Color-Blind and Special Emulsions. Infra-Red and Reversible Films. Emulsion Speed Values. Comparative Table of Speed Ratings. When to Use a Certain Film. Films for the Leica.

Part II — Film Exposure

Exposure Meters. How to Use an Exposure Meter. How to Make Exposures Without an Exposure Meter. Exposures for Photoflash.

Part III — Film Development

Development with Relation to Exposure. Developing Equipment. Developers. Preparing Your Own Developer. Developing Formulas. Dr. Sease Fine Grain Developers. A Modified Dr. Sease Fine Grain Developer. Time and Temperature Control of Fine Grain Developers. Compromise Developers. Re-using Developers. Agitation. Shortstop and Fixing Bath. Washing the Film. Drying the Film. Soaking a Film Before Development. Steps in Developing a Film. General Suggestions. Reticulation. Newton Rings. Film Cleaner. Reducing and Intensifying Leica Negatives. Formulas and Procedure for Reversible Film. Storage and Preservation of Films.

CHAPTER 6. Dry Hypersensitizing of Leica Films-----159

by F. Dersch and H. Duerr

Mercury Vapor Treatment. Increasing Sensitivity from 75% to 150%. Practical Applications. Keeping Qualities and Storage.

**CHAPTER 7. Making of Enlarged Negatives
Three Methods**-----167

by John N. Harman, Jr.

Direct Copy Film. Reversible Film. Intermediate Film Positive. Formulas.

CHAPTER 8. Your Own Leica Darkroom-----171

by Willard D. Morgan

The Darkroomette. A Model Darkroom. Bathtub Finishers. Stocking the Laboratory. A Two Room Laboratory.

CHAPTER 9. Enlarging and Contact Printing-----179

by Willard D. Morgan

Selecting the Equipment. Valoy Enlarger. Focomat Enlarger. Accessories. Vasex Enlarger. Making the Actual Enlargements. Estimating Print Density. Printing Control During Enlarging. Photoflood Bulbs. Contact Printing.

CHAPTER 10. Enlarging Papers and Printing-----197

by Elbert M. Ludlam

Choice of Paper Stocks and Surfaces. Tone Gradation. Fast and Slow Projection Papers. Contact Papers. Development. Exposure. Exposure Factors at Various Magnifications. Comparative Speed of Various Projection Papers. Short Stop. Fixing. Washing. Hypo Test. Drying. Ferrotyping. Toning. Spotting. Presentation of the Finished Prints. Embossing Prints.

CHAPTER 11. Copying and Close-up Photography-----223

by Willard D. Morgan — Data Tables by Henry M. Lester

Importance of Small Object Photography. Accessories. Sliding Focusing Copy Attachment. Extension Tubes. Data Tables for Extension Tubes Used Directly on the Leica. Tables for Extension Tubes and Formulas. Focusing. Avoiding Vibration During Copying. Critical Focusing with 30x Magnifying Glass. Focusing by Measurement. Fixed Focusing. Illumination. Making and Using Film Copies. Exposure Time. Films Used. Developing. Filters. Lighting Medical Specimens. Auxiliary Reproduction Devices. Rotating Copy Attachment. 250 Exposure Leica.

CHAPTER 12. Making Leica Positives for Projection-----257

by Willard D. Morgan

What Makes Good Positives. The Two Positive Printing Processes. Contact Printers. Eldia Printer Directions. Making the Leica Glass Positive. Projection Paper for Testing. Mounting the Finished Glass Slide. Film and Glass Slides by Projection. Combination Printer Directions. Belun 1:1 Copy Attachment.

CHAPTER 13. Projecting Leica Pictures-----273

by Willard D. Morgan

Equipment Available for Projection. Table of Screen Distances and Areas. Titles for Films. Storage.

CHAPTER 14. Stereoscopic Photography-----283

by Augustus Wolfman

The Stereo Equipment. Filters. Sunshades and Film. Stereo Color Pictures. Protecting the Stereos. Making of Stereo Prints. Stereo Projection.

CHAPTER 15. Natural Color Photography with Kodachrome and Wash-Off Relief Prints-----293

by Henry M. Lester

Additive and Subtractive Principle. Daylight or Artificial Light. Type A Film. Exposures in Artificial Light. Table for Photoflash Lamps. Medical Photography. Color Film Latitudes. Daylight Exposures. Filters. Daylight Kodachrome Exposure Guide. Projection. Black and White Pictures from Kodachrome Film. Wash-Off Relief. Wratten Copy Board Chart. Color Separation Filters. Formulas and Procedures.

CHAPTER 16. Defender Chromatone Color Printing Process-----317

by Rowland S. Potter

Making Actual Color Prints. Toning Separation Positive. Condensed Routine for Producing Chromatone Prints. Toning Chromatone Prints.

PART II — LEICA IN SCIENCE AND EDUCATION

CHAPTER 17. Education Through the Eye-----323

by Roy E. Stryker and Edwin Locke

Learning by Looking. Sources. Importance of a Shooting Script. Presentation. Flat Prints and Projection of Pictures. Uses of Visual Material. A Project in Visual Education. Narration by Instructor or Synchronized Record. Cost of Synchronized Recording. A Practical File System.

CHAPTER 18. The Leica in Historical Research-----343

by James A. Barnes, Ph.D.

Obtaining Complete Historical Record Pictures. The Research Equipment. Economical and Time Saving.

CHAPTER 19. Archeology and Exploration-----349

by Charles Breasted

Practical Field Work. Aerial Photographs. Archeology. Natural History and Exploration for the Amateur. Indirection Photography. Choice of Equipment and Its Care.

CHAPTER 20. The Miniature Camera for Miniature Monsters---369

by J. M. Leonard

Catching the Insects. Equipment. Photographing in the Field. Selecting the Correct Photographing Angle. Bringing Home the Catch. Mounting the Insects. Lighting. Ultraviolet Light. Equipment for Indoor Work. Photographing at Home. Exposure and Development.

CHAPTER 21. Photomicrography with the Leica Camera-----393

by H. W. Zieler

When to Use the Leica for Photomicrography. How to Adapt the Leica to the Microscope. Photomicrography of Living Matter with the Micro Ibsa Attachment. General Photomicrography with the Sliding Focus Attachment. Obtaining Critical Focus. Amateur Photomicrography. Selecting the Microscope. Illumination Apparatus. Magnification and Resolving Power. Light Sources. Filters and Films. Exposure.

CHAPTER 22. Dental Photography-----419

by A. Laurence Dunn, D.D.S.

Equipment Required. Making the Photographs. Focusing. Transillumination of Teeth. Illumination. Photographing Reflected Images. Determining Exposures. Reproduction of Pictures from Projection Screen. Importance of Keeping Accurate Records.

CHAPTER 23. The Leica as an Ophthalmic Camera-----435

by Henry M. Lester

New Equipment for Ophthalmic Photography. Mirror Reflex Housing. Exposure Factors. Illuminating the Eye. Flashlight Exposures. Color Filters. Natural Color Photography. Kodachrome. Making of Black-and-White Negatives from Kodachrome. Microphotography in Ophthalmology. Special Illumination. Infra-Red Photography. Placido Disc Reflections. Portraits of Patients. Smoke Box Photography.

CHAPTER 24. Infra-Red Photography-----457

by John P. Gaty

Infra-Red Films. Differences in Infra-Red Values. Infra-Red Photography in the Field of Medical Research. Criminology. Photomicrography. Exposures and Filters. Hypersensitizing the Film.

PART III — THE LEICA IN SPECIALIZED FIELDS

CHAPTER 25. Candid, Stage and News Photography-----467

by J. Winton Lemen

The Sequence Picture. My News Photo Technique. Weddings and Churches. Covering Conventions. Artificial Illumination. Films and Exposures. Film Development. Speed Gained by Enlarging Wet Films. Film Development Enroute. The Miniature Camera in the Courtroom. Where to Find Picture Subjects. Stage and Action Photography. Equipment Recommended. Standardizing Your Methods.

CHAPTER 26. Aerial Photography-----489

by John P. Gaty

Aerial Compared to Ground Photography. Leica as a Profitable Aerial Camera. Starting Your Own Aerial Photo Business. Controlling Perspective by Lens Selection. Making the Preliminary Ground Survey. Filters for Different Visibilities. Exposure. Infra-Red Photography. Films. Preventing Vibration During Exposure. Photographing from Transport Air Liners. Your Personal Airplane. Aerial Photos at Low Altitudes.

CHAPTER 27. Exploring with the Leica-----513

by Julien H. Bryan

Keeping a Clear Photographic Viewpoint. Patience and Good Manners Essential. Sense of Humor and Understanding Helps. Preparing for the Expedition. Elimination of Unessential Equipment. Selecting Film. Obtaining Correct Exposure. What Filters to Use. New Viewpoints. Photographic Restrictions and Censorship.

CHAPTER 28. Leica Photography in the Tropics-----531

by John W. Vandercook

Equipment. A Dehydrating Method. Developing the Film.

CHAPTER 29. Photomurals with the Leica-----537

by John T. Moss, Jr.

Relation of Photomurals to the Architecture. Physical Limitations of Size. Subject Matter. Composing the Photomural. Grain and Viewing Distance. Technical Photomural Procedure.
