CHAPTER		PAGE
	SECTION 1. THE HISTORY OF PHOTOGRAPHY	
1.	The History of Photography	1
	SECTION 2. THE OPTICS OF PHOTOGRAPHY	
2.	Photographic Optics	48
3.	The Photographic Objective	90
4.	The Camera and Accessories	124
5.	Light Sources for Photography	167
	SECTION 3. THE THEORY OF THE PHOTOGRAPHIC PROCESS	
6.	Introduction to Photochemistry	206
7.	The Photographic Emulsion	230
8.	Color Sensitizing Dyes for Photographic Emulsions	249
9.	The Latent Photographic Image and its Development ..	290
10.	Developing Agents and Solutions	315
11.	Fixing, Washing and Drying	352
12.	The Structure of the Photographic Image	373
	SECTION 4. PHOTOGRAPHIC SENSITOMETRY AND THE REPRODUCTION OF TONE	
13.	Photographic Sensitometry	390
14.	The Reproduction of Tone	440
15.	The Reproduction of Color in Monochrome	456
	SECTION 5. NEGATIVE PROCESSES	
16.	Negative Materials	475
17.	Exposure of the Negative	503
18.	Negative Development	518
19.	Defects in Negatives	556
20.	Intensification and Reduction of the Negative	565
21.	After Work on the Negative	582
	SECTION 6. POSITIVE PROCESSES	
22.	Developing-out Papers	592
23.	Contact and Projection Printing	616

CHAPTER	PAGE
24. Toning of Developed Silver Images	644
25. Bichromated-Colloid Processes	662
26. Platinum, Palladium, Iron and Plan-copying Processes	692
27. Finishing and Mounting the Print	705
28. Lantern Slides and Transparencies	718

SECTION 7. PHOTOGRAPHY IN COLOR

29. Principles of Three-Color Photography	733
30. Three-Color Negative Making	745
31. Subtractive Paper Printing Processes	762
32. Screen and Lenticular Processes	784
33. Integral Tripacks	801
34. Accuracy of Color Reproduction	815
